this volume continues the tradition of the life span development series presenting overviews of research programs on a variety of developmental topics research and theory in life span development have given increased attention to the issues of constancy and change in human development and to the opportunities for and constraints on plasticity in structure and function across life acknowledging the need for and existence of interconnection between age and developmental periods it focuses on conditions for possibly discontinuous development that emerge at later periods contributors to this series are sensitive to the restrictive consequences of studying only specific age periods such as old age infancy or adolescence each scholar

attempts to relate the facts about one age group to similar facts about other age groups and to move toward the study of transformation of characteristics and processes over the life span

newman and newman use a chronological approach to present development across the life span drawing on the psychosocial theory of erik erikson to provide a conceptual framework for the text the authors address physical intellectual social and emotional growth in all life stages focusing on the idea that development results from the interdependence of these areas at every stage and placing special emphasis on optimal development through life
